DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: no prior art teaches or fairly suggests a product of a full length of nucleotide or its corresponding amino acid sequence as the instant invention. The instant invention can be used to specifically detect differentiated osteoblasts tissues. The closest prior art is the reference of Bonaldo et al. (Genome Research (1996) 6: 791; GenCore version search Report) where Bonaldo et al. disclose a nucleotide sequence with nearly 99.6% identity with the part of the instant invention at position 315-555 fragment. However, the present invention is a full length sequence which has only a 72% identity compared to the reference of Bonaldo et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Cheu whose telephone number is 571-282-0814. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on 571-272-0823. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
